

JEWELRY CARE TIPS

KEEP YOUR JEWELRY SPARKLING!

- HAIRSPRAY IS THE NUMBER ONE CONTAMINANT OF FINE JEWELRY. HAIRSPRAY RESIDUE IS DIFFICULT TO REMOVE. FOR THOSE WHO WEAR JEWELRY WHEN APPLYING HAIRSPRAY, WE RECOMMEND FREQUENT CLEANING.
- KEEP BLEACH & HOUSEHOLD PRODUCTS CONTAINING CHLORINE AWAY FROM JEWELRY. CHLORINE WEAKENS GOLD ALLOYS & TURNS GOLD JEWELRY BRITTLE LEADING TO FLAKING & DETERIORATION.
- REGULARLY INSPECT YOUR GOLD JEWELRY FOR SIGNS OF WEAKNESS OR DAMAGE. WE RECOMMEND CHECKING THE SECURITY OF GOLD GEMSTONE SETTINGS WITHIN THE FIRST 3 MONTHS & EVERY 6 MONTHS AFTER. MISSING OR DAMAGED SETTINGS ARE THE LEADING CAUSE OF LOST GEMSTONES. WE WILL INSPECT YOUR JEWELRY AT NO CHARGE.
- IT IS IMPORTANT TO STORE JEWELRY PIECES SEPARATELY FROM EACH OTHER TO PREVENT SCRATCHING & DAMAGE. TO PROTECT JEWELRY WHILE IN STORAGE, WE RECOMMEND A SOFT PROTECTIVE POUCH.
- KEEP DELICATE & FASHION JEWELRY AWAY FROM HEAT & DIRECT SUN. AVOID BLEACH, AMMONIA & ALCOHOL BASED CLEANERS.
- COSMETICS CAN DAMAGE JEWELRY. PEARLS SHOULD BE PUT ON AFTER MAKEUP & THE USE OF HAIRSPRAY. COSMETICS & HAIRSPRAY CAN DULL PEARLS & DAMAGE THE SILK USED TO HOLD PEARL NECKLACES OR BRACELETS TOGETHER. INSPECT STRINGS OF PEARLS EVERY 6-12 MONTHS. CHECK FOR SIGNS OF WEAR BETWEEN PEARLS & AT KNOTS IN THE SILK. AT THE SIGN OF WEAR, WE RECOMMEND RESTRINGING PEARLS.
- KEEP PEARLS AWAY FROM VINEGAR (THIS INCLUDES SALAD DRESSING). EVEN A SMALL AMOUNT WILL ACT AGGRESSIVELY TO DISSOLVE A PEARL. IF VINEGAR COMES IN CONTACT WITH YOUR PEARLS, IT IS IMPORTANT TO RINSE THEM QUICKLY, UNDER GENTLY RUNNING WATER.
- MAJESTIC'S TALENTED STAFF IS HAPPY TO ASSIST WITH ANY JEWELRY QUESTIONS OR REPAIRS - INCLUDING FREE RING CLEANING & WATCH BATTERY REPLACEMENT. STOP BY TODAY!
